PRODUCT PERFORMANCE

Intended to fragrance rooms up to 85 cubic metres.
Fragrance uses Micromorph technology which by physical interaction prevents evaporation of the malodour molecules and by chemical interaction with malodour molecules and the nose receptors helps to reduce the malodour.
Spraying the refill against hard surfaces can cause staining. Dispenser for refill should always be positioned to spray into the washroom and away from walls ceiling maintaining 2.2m height from the floor as shown on the refill label.

ADDITIONAL INFORMATION

Transport information:
IMDG/GGV Sea Class 3
UN Number 1987
Packaging Group II

Storage temperature 0 – 30 °C
Storage conditions Store away from sources of ignition. If possible store in flammable liquid store to contain pool fire if product were to be set alight.

Refill uses mechanical spray pump to atomise fragrance, refill is not pressurised and does not use CFC propellant.
Particle size above threshold for respiratory risk.
Fragrance tested extensively for skin irritation when in contact with good and broken skin. No evidence of dermal irritation found.

NOTE

This data was generated from samples which were taken to be typical of standard product. The data is given for information only. Additional information can be supplied on request.
