### Safety Data Sheet

According to Annex II to REACH - Regulation 2020/878 and to Annex II to UK REACH

**SECTION 1. Identification of the substance/mixture and of the company/undertaking**

**1.1. Product identifier**  
Code: DB1016A0  
Product name: DET&RINSE  
UFI: PE00-G05A-G008-YH6D

**1.2. Relevant identified uses of the substance or mixture and uses advised against**  
Intended use: Oven cleaner (EUPCS: PC-CLN-10.4)

| Identified Uses                                                   | Industrial | Professional                                 | Consumer |
|-------------------------------------------------------------------|------------|----------------------------------------------|----------|
| Transfer to a container through a dedicated line (bottle/machine) | -          | ERC: 8a.<br>PROC: 8b.<br>PC: 35.<br>LCS: PW. | -        |

**Uses Advised Against**  
Any use other than those identified.

**1.3. Details of the supplier of the safety data sheet**  
Name: Unox S.p.A.  
Full address: Via Majorana, 22  
District and Country: 35010 Cadoneghe (Padova) Italia  
tel. +39 049 86 57 511  
fax +39 049 86 57 555  
Hartnoll Ltd.  
Unit 15 The Empire Centre  
Imperial Way  
Watford  
WD24 4YH  
tel. 01923 239 290

e-mail address of the competent person responsible for the Safety Data Sheet: det.rinse@unox.com

**1.4. Emergency telephone number**  
For urgent inquiries refer to: Verisk-3E  
Tel. (+)1-760-476-3961  
Tel. (+)0-800-680-0425 (UK)  
Access code: 334577  
24h/24h

**SECTION 2. Hazards identification**

**2.1. Classification of the substance or mixture**

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878.  
Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

|                                                      |      |                                          |
|------------------------------------------------------|------|------------------------------------------|
| Substance or mixture corrosive to metals, category 1 | H290 | May be corrosive to metals.              |
| Skin corrosion, category 1B                          | H314 | Causes severe skin burns and eye damage. |
| Serious eye damage, category 1                       | H318 | Causes serious eye damage.               |

|                                                                                    |                        |                                                                                                                           |  |

**2.2. Label elements**

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words: Danger

Hazard statements:

**H290** May be corrosive to metals.  
**H314** Causes severe skin burns and eye damage.

Precautionary statements:

**P264** Wash hands thoroughly after handling.  
**P280** Wear protective gloves / protective clothing / eye protection / face protection.  
**P301+P330+P331** IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.  
**P303+P361+P353** IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].  
**P305+P351+P338** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
**P310** Immediately call a POISON CENTER.

**Contains:** POTASSIUM HYDROXIDE

Ingredients according to Regulation (EC) No. 648/2004

|                              |                                                                    |
|------------------------------|--------------------------------------------------------------------|
| Less than 5%                 | anionic surfactants, amphoteric surfactants, non-ionic surfactants |
| 5% or over but less than 15% | phosphates                                                         |

**2.3. Other hazards**

On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration ≥ 0.1%.

**SECTION 3. Composition/information on ingredients**

**3.2. Mixtures**

| EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |                                                                                                        |                                                                                                                           |
| SKIN: Remove contaminated clothing. Wash immediately with plenty of water. If irritation persists, get medical advice/attention. Wash contaminated clothing before using it again.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |             |                                                                                                        |                                                                                                                           |
| INHALATION: Remove to open air. In the event of breathing difficulties, get medical advice/attention immediately.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |             |                                                                                                        |                                                                                                                           |
| INGESTION: Get medical advice/attention. Induce vomiting only if indicated by the doctor. Never give anything by mouth to an unconscious person, unless authorised by a doctor.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |                                                                                                        |                                                                                                                           |
| 4.2. Most important symptoms and effects, both acute and delayed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |             |                                                                                                        |                                                                                                                           |
| This product is corrosive and causes serious burns and vesicles on the skin, which can arise even after exposure. Burns are very stinging and painful. Upon contact with eyes, it may cause serious harm, such as cornea opacity, iris lesions, irreversible eye coloration. The vapors and/or powders are caustic for the respiratory system and may cause pulmonary edema, whose symptoms sometimes arise only after some hours. Exposure symptoms may include: sting, cough, asthma, laryngitis, respiratory disorders, headache, nausea and sickness. If swallowed, it may cause mouth, throat and oesophagus burns, sickness, diarrhoea, edema, larynx swelling and, consequently, asphyxia. Perforation of the gastro-intestinal tract is also possible. |             |                                                                                                        |                                                                                                                           |
| 4.3. Indication of any immediate medical attention and special treatment needed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |             |                                                                                                        |                                                                                                                           |
| Keep the safety data sheet of the preparation or, failing that, the label available for the medical personnel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |             |                                                                                                        |                                                                                                                           |

|                                                                                    | DET & RINSE |                                                                                                                           |

None in particular.

**5.2. Special hazards arising from the substance or mixture**

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE  
Do not breathe combustion products.

**5.3. Advice for firefighters**

GENERAL INFORMATION  
Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.  
SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS  
Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

**6.1. Personal precautions, protective equipment and emergency procedures**

Evacuate area. Send away individuals who are not suitably equipped. Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. Use breathing equipment if powders are released into the air.

**6.2. Environmental precautions**

The product must not penetrate into the sewer system or come into contact with surface water or ground water. Avoid the formation of powder and dispersion of the product in the air.

**6.3. Methods and material for containment and cleaning up**

Collect the leaked product and place it in containers for recovery or disposal. Make sure the leakage site is well aired. It may be advisable to wash with water any surfaces contaminated with traces of dust, without contaminating waste water.

**6.4. Reference to other sections**

Notify the competent authorities if the product has reached waterways or if it has contaminated the ground or vegetation.

SECTION 7. Handling and storage

**7.1. Precautions for safe handling**

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

Use only with the automatic system supplied with UNOX ovens. Use frequency: up to 5 days/week. Duration of use: up to 10 minutes/day.

**7.2. Conditions for safe storage, including any incompatibilities**

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details. The product is alkaline and may generate hydrogen gas if it comes in contact with metals such as aluminium, zinc and tin.

The hydrogen gas developed may cause combustion when the product is transferred to a metal container made from one of the metals indicated above, or which has been in contact with the same for an extended period of time.

Legend:  
(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.  
VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified ; LOW = low hazard ; MED = medium hazard ; HIGH = high hazard.

## 8.2. Exposure controls

The use of appropriate technical measures should always take priority over personal protection equipment. Provide a good level of general ventilation in the workplace (3 to 5 air changes per hour). The individual protection devices must bear the CE marking that certifies their compliance with the regulations in force.

Provide an emergency shower with face and eye wash station.

## HAND PROTECTION

Protect your hands with category III work gloves (ref. Standard EN 374). For the final choice of material for work gloves, the following must be considered: compatibility, degradation, breakage time and permeation. Gloves have a wear time that depends on the duration and mode of use. Suitable gloves (protection factor 6, permeation time > 480 minutes): material (thickness, mm): nitril rubber (0.35 mm), polychloroprene (0.5 mm), polyvinylchloride (0.5 mm).

## SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

## EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

## RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, a mask with a type A filter combined with a type P2 filter should be worn (see standard EN 14387). Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

## ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

## SECTION 9. Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

| Properties      | Value          | Information                               |
|-----------------|----------------|-------------------------------------------|
| Appearance      | liquid         |                                           |
| Colour          | straw yellow   |                                           |
| Odour           | characteristic |                                           |
| Odour threshold | not applicable | Reason for missing data:Not applicable to |

## SECTION 10. Stability and reactivity

### 10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

### 10.2. Chemical stability

The product is stable in normal conditions of use and storage.

### 10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

POTASSIUM HYDROXIDE

Reacts violently with: strong acids.Develops hydrogen on contact with: aluminium alloys,copper alloys,zinc alloys,light metals.Reacts violently with: peroxides.

| <u>Delayed and immediate effects as well as chronic effects from short and long-term exposure</u><br>This product is corrosive and causes serious burns and vesicles on the skin, which can arise even after exposure. Burns are very stinging and painful. Upon contact with eyes, it may cause serious harm, such as cornea opacity, iris lesions, irreversible eye coloration. The vapors and/or powders are caustic for the respiratory system and may cause pulmonary edema, whose symptoms sometimes arise only after some hours. Exposure symptoms may include: sting, cough, asthma, laryngitis, respiratory disorders, headache, nausea and sickness. If swallowed, it may cause mouth, throat and oesophagus burns, sickness, diarrhoea, edema, larynx swelling and, consequently, asphyxia. Perforation of the gastro-intestinal tract is also possible. |                                                                                |                                                                                                                           |

POTASSIUM HYDROXIDE  
Corrosive (OECD method 431 - Perkins M.A. et al., Fund. Appl. Toxicol., 31, 9-18).

SERIOUS EYE DAMAGE / IRRITATION  
Causes serious eye damage

POTASSIUM HYDROXIDE  
Corrosive (OECD method 405 - Johnson g.t. et al, Toxicol. Appl. Pharmacol., 32, 239-245).

RESPIRATORY OR SKIN SENSITISATION  
Does not meet the classification criteria for this hazard class

POTASSIUM HYDROXIDE  
Not sensitizing (Johnson G.T. et al, Toxicol. Applied Pharmacol., 32, 239-245).

Respiratory sensitization  
Information not available

Skin sensitization  
Information not available

GERM CELL MUTAGENICITY  
Does not meet the classification criteria for this hazard class

CARCINOGENICITY  
Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY  
Does not meet the classification criteria for this hazard class

Adverse effects on sexual function and fertility  
Information not available

Adverse effects on development of the offspring  
Information not available

Effects on or via lactation  
Information not available

STOT - SINGLE EXPOSURE  
Does not meet the classification criteria for this hazard class

Target organs  
Information not available

Route of exposure  
Information not available

STOT - REPEATED EXPOSURE  
Does not meet the classification criteria for this hazard class

Target organs  
Information not available

Route of exposure  
Information not available

| The product is completely soluble in water. High mobility in soil is expected.                                                                                                                                                                                                                                                                             |                                                                                                                                                                          |                                                                                                                            |
| 12.5. Results of PBT and vPvB assessment                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                          |                                                                                                                            |
| On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.                                                                                                                                                                                                                                                    |                                                                                                                                                                          |                                                                                                                            |

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

**12.7. Other adverse effects**

No other significant adverse effects for the environment are known.

SECTION 13. Disposal considerations

**13.1. Waste treatment methods**

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.  
Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.  
Waste transportation may be subject to ADR restrictions.  
CONTAMINATED PACKAGING  
Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

HP codes (intact product):  
HP8 - Corrosive

SECTION 14. Transport information

**14.1. UN number or ID number**

ADR / RID, IMDG, IATA: 1814

**14.2. UN proper shipping name**

ADR / RID: POTASSIUM HYDROXIDE SOLUTION  
IMDG: POTASSIUM HYDROXIDE SOLUTION  
IATA: POTASSIUM HYDROXIDE SOLUTION

**14.3. Transport hazard class(es)**

Revision n. 3  
Dated 16/01/2023  
Printed on 16/01/2023  
Page n. 14/16  
Replaced version:2 (Printed on: 05/04/2017)

Substances subject to the Stockholm Convention:

None

Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

Regulation (EC) No. 648/2004

Ingredients according to Regulation (EC) No. 648/2004

The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.

15.2. Chemical safety assessment

A chemical safety assessment has been performed for the following contained substances

POTASSIUM HYDROXIDE

D-GLUCOPYRANOSE, OLIGOMER C8-C10 GLUCOSIDE

SECTION 16. Other information

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Met. Corr. 1

Substance or mixture corrosive to metals, category 1

Acute Tox. 4

Acute toxicity, category 4

Skin Corr. 1A

Skin corrosion, category 1A

Skin Corr. 1B

Skin corrosion, category 1B

Eye Dam. 1

Serious eye damage, category 1

Aquatic Chronic 3

Hazardous to the aquatic environment, chronic toxicity, category 3

H290

May be corrosive to metals.

H302

Harmful if swallowed.

H314

Causes severe skin burns and eye damage.

H318

Causes serious eye damage.

H412

Harmful to aquatic life with long lasting effects.

Use descriptor system:

ERC

8a

Widespread use of non- reactive processing aid (no inclusion into or onto article, indoor)

LCS

PW

Widespread use by professional workers

PC

35

Washing and cleaning products

PROC

8b

Transfer of substance or mixture (charging and discharging) at dedicated facilities

LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road

- ATE: Acute Toxicity Estimate

- CAS: Chemical Abstract Service Number

- CE50: Effective concentration (required to induce a 50% effect)

- CE: Identifier in EHS (European archive of existing substances)
- CLP: Regulation (EC) 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent bioaccumulative and toxic as REACH Regulation
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PNEC: Predicted no effect concentration
- REACH: Regulation (EC) 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA: Time-weighted average exposure limit
- TWA STEL: Short-term exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation
- WGK: Water hazard classes (German).

CALCULATION METHODS FOR CLASSIFICATION  
Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.  
Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.  
Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
