## Zonitise Antimicrobial Laundry Additive

### UK's first and only antimicrobial laundry additive

Zonitise Antimicrobial Laundry Additive is a revolutionary new product that infuses machine-washable fabrics with continuous antimicrobial protection against many harmful pathogens and bacteria that cause odours and degrade fabric. Traditional laundry detergent gets clothes clean, but is not effective against germs and other bacteria, which can remain and multiply on clothes and laundry between washes. Zonitise Antimicrobial Laundry Additive provides constant antimicrobial protection that not only helps the user stay healthy but keeps washing smelling fresher for longer.

### Features & benefits:

- The only product of its kind in the UK
- Provides long-lasting protection against germs and odours between washes
- Preserves and extends life of fabrics
- Hypoallergenic, perfume and dye-free
- Non-bleaching
- Safe for all machine washable fabrics at all temperatures
- Works alongside your favourite detergent to protect your laundry
- Protects for up to 5 washes

Detergent cleans. Zonitise protects.

**Add 50ml of Zonitise per 5kg of washing (5kg is a full load for domestic machine).**

### Product codes:

Product	Size	Case	Code
Zonitise Laundry Additive	500ml	1	N08589
Zonitise Laundry Additive	10L	1	N08606
