Reduce risk and inspire confidence with effective janitorial supplies

Good housekeeping and robust janitorial systems are vital for the safety and confidence of guests and employees in all hospitality environments. Operators must ensure that they are utilising a range of effective janitorial supplies to regularly clean and sanitise surfaces.

Bunzl Catering Supplies provide an essential range of janitorial supplies designed to equip hospitality operators with the tools and systems they require to accomplish all routine and periodic janitorial tasks to the very highest standard.

CleanWorks®

Tackle janitorial tasks confidently with exclusive brand CleanWorks®

Our exclusive brand CleanWorks® janitorial range includes refuse sacks, mopping systems and cleaning cloths, specifically designed to handle multiple requirements in a hospitality operation.

- ✓ CleanWorks® sacks come in a range of formats, from light duty refuse sacks that handle paper and general office waste to heavy duty refuse sacks for catering and trade waste.
- ✓ CleanWorks® MicroClean flat mopping system enables easier, faster and more effective cleaning, especially in high traffic environments where surfaces need to be cleaned and dried quickly.
- ✓ CleanWorks® ProClean flat mopping system is a microfibre system combining a spray handle and microfibre pads for floor cleaning without the need for buckets or constant wringing out.
- ✓ CleanWorks® cloths are apertured to ensure efficient dirt pick-up, they are clearly colour coded to prevent cross-contamination and are compatible with a wide range of cleaning agents.

How to choose the correct sack

There are a variety of refuse sacks available to catering operators, choosing the correct refuse sack for your business will help you control costs and manage your waste safely and hygienically. Before you choose your refuse sack consider the following three questions carefully:

1. What type of waste will go into the sack?

Paper and general office waste	General domestic refuse	Segregated recycling waste	Catering and trade waste	Trade and industrial waste
CleanWorks® light duty refuse sacks	CleanWorks® medium duty refuse sacks	CleanWorks® medium duty clear sack	CleanWorks® heavy duty refuse sacks	CleanWorks® extra heavy duty refuse sacks

2. How much weight will the sack be required to hold?

3. What size bin is the sack required to fit?

Fit the refuse sack to the size of your bin. If the sack is too small, waste will spill out of the sack and into the bin. If the sack is too large, there will be overhanging sack outside the bin. Use the following two calculations to ensure you buy the right size sack:

To calculate the correct circumference:

Measure across the rim of your bin and compare to the depth (D) and width (W) of the refuse sacks in this catalogue.

To calculate the correct height:

Measure the height (H) of your bin and then add an additional seven inches of overhang for tying.

General use refuse sacks are categorised by application weight

CleanWorks® light duty refuse sacks

For paper and general office waste

Colour-coded cleaning systems

The aim of a janitorial colour-coding system is to prevent cross-contamination during the cleaning process. If a single mop was used to clean every floor in a restaurant bacteria could spread from the washrooms and front of house to food preparation areas. This carries risk of cross-contamination and consequently illness. Applying a colour-coded system to separate areas is the most efficient and effective way of reducing the risk of cross-contamination.

For this system to work, you will need to assign a different colour mop to each area, with a matching colour-coded handle, head and bucket to make it easily identifiable. This hygienic cleaning system can be applied to any cleaning equipment that is used in each area, such as cloths, brooms and gloves.

Recommended universal colour code

In the late 1990s, The British Institute of Cleaning Science (BICSs) first began to develop a universal colour code. For conforming to inspections by the Environmental Health Officer (EHO), the use of colour-coded cleaning equipment is particularly useful and has been widely adopted by the catering and hospitality industry.

General areas,

bathrooms and
sanitary appliances

Standard Screw Handle

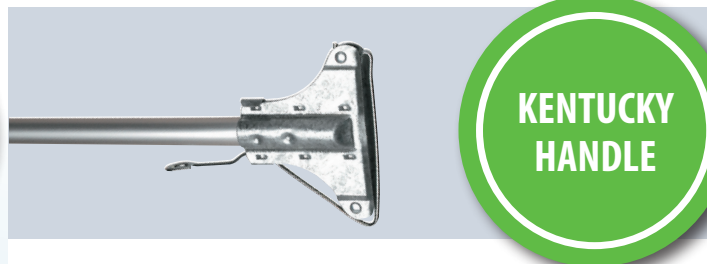

Fits socket mops and Exel® mops.

How to connect a standard screw handle:

Place the end of the handle against the mop head connection and twist towards you. The handle should begin to screw securely onto the mop head.

How to disconnect a standard screw handle:

Keep the mop head on the floor and secure with your feet. Twist the handle anti-clockwise until the mop head is disconnected.

Kentucky Handle

Fits kentucky mops.

How to connect a kentucky handle:

Release the clip/spring lever on the handle. Slide the centre band of the mop head over the clip/spring bracket so that each side of the mop head falls equally on each side. Reattach the clip/spring lever.

How to disconnect a kentucky handle:

Release the clip/spring lever and slide the mop head out. Reattach the clip/spring lever.

Deluxe Screw Handle

Fits broomheads and deck scubbers.

How to connect a deluxe screw handle:

Place the end of the handle against the mop head connection and twist towards you. The handle should begin to screw securely onto the mop head.

How to disconnect a deluxe screw handle:

Keep the mop head on the floor and secure with your feet. Twist the handle anti-clockwise until the mop head is disconnected.

Exel® Handle

Fits Exel® mops and Big White mops.

How to connect an Exel® handle:

Place the end of the handle against the mop head connection and give a short, firm push. The handle should secure straight onto the mop head.

How to disconnect an Exel® handle:

Keep the mop head on the floor and secure with your feet. Give a short, firm pull upwards, the handle will disconnect.

Socket mops

Socket mops with buckets and wringers are the most effective option for mopping smaller floor areas. The range includes traditional pure yarn mop heads, and the increasingly popular Hygiemix mops, which reduce linting and can be machine washed if required.

12J 180g

Traditional socket mops

A traditional yarn mop suitable for general purpose mopping. The absorbent PY yarn is suitable for smoother floor surfaces like laminate or lino flooring.

PY yarn RS1 socket mop No. 12J 180g

	Colour	Yarn weight	Cased	Head	52"Handle

Safe and effective mopping system

Clean floors not only look good but improve the safety of the guests and employees in a hospitality operation. If not maintained properly floors can become dirty or greasy which then can cause a trip or slip hazard.

Our comprehensive range of socket and kentucky mopping systems from Robert Scott®, together with innovative flat mopping tools from our exclusive brand CleanWorks®, provide operators everything they need to keep floors safe and clean.

14L

Buckets and wringers

CleanWorks® MicroClean flat mop system

EXCLUSIVE
BRAND

Simple to use and flexible enough to clean difficult and high traffic areas with maximum cleaning performance and speed

CleanWorks® **MicroClean** flat mopping system enables easier, effective cleaning, especially in high traffic environments where surfaces need to be cleaned and dried quickly. CleanWorks® **MicroClean** is designed to be used with microfibre flat mop pads, which uses the minimum amount of water for fast drying, and without chemicals.

Features and benefits:

- 20 litre combination bucket and wringer with a built-in water divider
- Fast and efficient wringer removes most of the water for quicker drying, saving time
- Microfibre mop head attracts and holds dirt for effective cleaning
- Hygienic colour-coded flagged mop head for use in different areas
- For added safety the mop bucket has 'wet floor' graphics on two sides
- Durable plastic break-frame ensures easy fitting and removal of MicroClean flat mop head

CleanWorks® ProClean flat mop system

Quick and effective
bucketless mop system
ideal for rapid response
and spot floor cleaning

CleanWorks® **ProClean** flat mopping system is an innovative microfibre system combining the spray handle and antibacterial and scrub microfibre pads for effective, rapid response floor cleaning without the need for buckets or constant wringing out. CleanWorks® **ProClean** features a removable bottle and spray trigger, which delivers a fine mist of solution directly to the cleaning surface, helping you to clean and dry floors quickly.

Features and benefits:

- Ideal for quick response damp mopping
- Microfibre mops attract and hold dirt for effective cleaning without the need for chemicals
- Lightweight and no need for bucket, so great for spot cleaning
- Nano silver treated fibres for long-lasting antibacterial effectiveness
- Can be used wet for tougher cleaning or dry for drying or dusting
- Removable water bottle means no buckets are required making cleaning easier and saving time

Vileda UltraSpeed Pro flat mop system

Whatever the cleaning requirements, UltraSpeed Pro will dramatically increase cleaning speed, performance, versatility and ergonomics resulting in lower overall costs. The secret behind the UltraSpeed Pro is the unique press allowing cleaners to start using the system without the need for training.

Features and benefits:

UltraSpeed Pro flat mop system outperforms bucket-and-press systems in all areas and includes options to suit all sites, starting with the single bucket mopping system for general floor cleaning. Add a second bucket onto the chassis and you have a double bucket system for mopping larger areas.

- Cleans over 750 m2* per hour
- High-performance press – drier floors reducing slip hazards
- Hygienic – no hand contact with mops or cleaning solution
- Easy to use – no training required
- Compact – small footprint for space saving storage
- Ergonomic – lightweight, no bending to wring
