INNOVATE

Material and design innovation

Innovation creates value for hospitality operators by applying new solutions to meaningful problems. In recent years, environmental legislation and growing public concern over waste has put an increased focus on innovation in product and material design, supply chain management and end-of-life solutions for single-use food packaging.

As part of its Sustainable Future programme, Bunzl Catering Supplies is working with leading suppliers to bring innovation in food packaging and hygiene solutions to its customers.

Safe and sustainable solutions

In the wake of Covid-19, innovation in single-use food packaging is helping operators mobilise delivery and take-out options, while robust on-site hygiene programmes continue to be critical for customer confidence. As a market leader, Bunzl Catering Supplies ensures catering operators are equipped with the products they need to reduce risk and to operate safely and sustainably.

The Innovate brochure showcases a collection of material and design innovation in food packaging and hygiene solutions that meet environmental legislation and provide safe and sustainable solutions in the wake of Covid-19.

EcoCore® reusable cups and lids

EcoCore® is a reusable and recyclable cup and lid range manufactured with an advanced EcoCore® technology. EcoCore® creates walls with a smooth inner and wavy outer face separated by an insulated foam core, typically reducing the amount of material needed to make products with the same performance as solid alternatives. Made from 100% polypropylene, EcoCore® cups and lids are insulated, durable and dishwasher safe up to 1000 cycles.

ecoCore®

EcoCore® reduces consumption of non-replaceable natural resources and the amount of energy needed for manufacturing.

EcoCore® cups:

- Reusable and recyclable
- EcoCore® technology
- 100% polypropylene
- Insulated
- Durable and dishwasher safe
- Lightweight
- Microwave safe

HuskeeCup reusable cups

HuskeeCup is a range of reusable cups made from the coffee husk waste that is generated from coffee bean production. HuskeeCup cups are BPA-free and food safe approved. Extremely durable, HuskeeCup cups don't chip or crack easily and their unique thermal properties keep hot drinks hotter for longer.

The fins offer exceptional insulation, the lid can be squeezed on with one hand and there are drain slots on the base to remove excess water after dishwashing.

Huskee.

HuskeeCup:

- Made from the coffee husk waste that is generated from coffee bean production
- Iconic fin design feature
- BPA-free and food safe approved
- Durable with thermal properties
- Dishwasher safe

Reuse stainless steel cutlery

In line with the UK Government Waste and Resource Strategy, disposable plastic cutlery (including products formed from PLA) will be banned from April 2023. Reuse lightweight stainless steel cutlery provides a fully recyclable alternative to plastic cutlery that can be washed and reused many times.

Stainless steel cutlery:

- Lightweight stainless steel design
- Alternative to disposable plastic cutlery
- Fully recyclable material
- Can be washed and reused many times
- Dishwasher proof
- Imperishable, safe and hygienic

Product codes:

Product	Case	Code
Reuse Knife	500	F12018
Reuse Fork	500	F12019
Reuse Spoon	500	F12020
Reuse Teaspoon	500	F12021

Reuse

Reusable Packaging

Reuse™

Reuse is a range of foodservice packaging designed to be used multiple times before disposal. Reuse products may be specifically designed for a circular take-use-return programme and will be suitable for repeat cleaning in a dishwasher. Reuse products identified as recyclable should be placed in a dedicated recyclables bin to ensure they are sent to a material recovery facility for recycling.

Recyclable paper cutlery

A fully recyclable paper cutlery range from Sabert, with a smooth feel and pleasant mouth sensation. The design is stylish and strong, delivering excellent performance with both hot and chilled food. Made from paper that has FSC® accreditation, this paper cutlery is fully recyclable in a paper waste stream.

Paper cutlery is an innovation on the market that provides a sustainable cutlery option with excellent performance in use.

Paper cutlery:

NEW
2022

- FSC® accreditation
- Recyclable in paper waste stream
- Stylish design with a smooth feel and pleasant mouth sensation
- Strong, robust and durable
- Performs well with stiffness and cut quality
- Can be used with both hot and chilled foods

Product codes:

Product	Size	Case
Knife	17cm	1000
Fork	17cm	1000
Dessert Spoon	17cm	1000
Teaspoon*	13cm	1000

* The teaspoon is available from September 2022.

750cc Plaza Bowl

Case: 500
Code: H07662
Lid to fit: H07343

The Faerch Plaza range is 100% recyclable and is made using 100% renewable energy.

Faerch

Packaging that cares

Plaza bowls:

- 100% recyclable
- Manufactured using 100% renewable energy
- Third party audited certification on recycled content
- Fully compliant to the highest standards of food safety
- Easily sorted by UK waste processors
- Proven and tested to be NIR detectable
- Natural colour scheme (colours will vary)

Evolve by Faerch CPET meal trays

Evolve by Faerch CPET meal trays are made from up to 75% of post-consumer recycled content, available in naturally fluctuating tones since no extra colour is added during recycling and production. Evolve by Faerch meal trays are reliably detected by existing sorting infrastructure in the UK and returned to the mixed stream where they can be recycled into new food safe products again and again.

Evolve by Faerch provides effective guidance to customers to identify circular packaging and treat trays as a resource after use, whilst providing maximum on-shelf appeal.

Faerch | *Packaging that cares*

CPET meal trays:

- Trays can be recycled back into food service packaging
- Third party audited certification on recycled content
- Fully compliant to the highest standards of food safety
- Easily sorted by UK waste processors
- Proven and tested to be NIR detectable
- Natural colour scheme (colours will vary)

CleanWorks® MicroClean flat mopping system

CleanWorks® MicroClean flat mopping system enables easier, effective cleaning, especially in high traffic environments where surfaces need to be cleaned and dried quickly. CleanWorks® MicroClean is designed to be used with microfibre flat mop pads, which uses the minimum amount of water for fast drying, and without chemicals.

CleanWorks® MicroClean complete kit:

- ✓ Colour-coded aluminum handle
- ✓ Wheeled 20L combination mop bucket and wringer
- ✓ Multi-colour flagged mop head Break-frame head

Features & benefits:

- 20 litre combination bucket and wringer with a built-in water divider
- Fast and efficient wringer removes most of the water for quicker drying, saving time
- Microfibre mop head attracts and holds dirt for effective cleaning
- Hygienic colour-coded flagged mop head for use in different areas
- For added safety the mop bucket has 'wet floor' graphics on two sides
- Durable break-frame ensures easy fitting and removal of MicroClean flat mop head

Product codes:

Product	Colour	Size	Case	Code

CleanWorks® ProClean flat mopping system

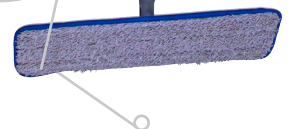

CleanWorks® ProClean flat mopping system is an innovative microfibre system combining the spray handle and antibacterial scrub microfibre pads for effective, rapid-response floor cleaning without the need for buckets or constant wringing out. CleanWorks® ProClean features a removable bottle and spray trigger, which delivers a fine mist solution directly to cleaning surfaces, helping you to clean and dry floors quickly.

CleanWorks®

CleanWorks® ProClean complete kit:

- ✓ Aluminum handle with removable 400ml spray bottle
- ✓ Nano silver antimicrobial microfibre mop pad
- ✓ Mop jointed-frame for easy fitting of mop pads

Features & benefits:

- Microfibre mops attract and hold dirt for effective cleaning without the need for chemicals
- Lightweight and no need for buckets so great for spot cleaning
- Nano silver treated fibres for long-lasting antibacterial effectiveness.
- Can be used wet for tougher cleaning or dry for drying or dusting
- Removable water bottle means no buckets are required making cleaning easier and saving time
