CleanWorks® ProEco compostable cloths

The CleanWorks® ProEco compostable cloth is made from 100% compostable fibres from renewable resources, providing a sustainable alternative to your cleaning operation. It is also FCC certified (Food Contact Clearance), which makes it safe to use in food service establishments. To reduce the risk of cross-contamination, the wipes are colour-coded using natural inks and according to HACCP norms.

CleanWorks®

Features & benefits:

- Made from responsibly sourced 100% viscose fibres from PEFC certified sources
- Tested and certified compostable according to EN 13432
- FCC certified (Food Contact Clearance)
- Colour-coded using natural inks
- Can be used with a variety of chemical solvents and then rinsed out and disposed of in a food waste bin*

Product codes:

	Colour	Spec	Size	Case	Code
	Red	50 GSM	38 x 30cm	1 x 50	P10537
	Blue	50 GSM	38 x 30cm	1 x 50	P10535
	Yellow	50 GSM	38 x 30cm	1 x 50	P10538
	Green	50 GSM	38 x 30cm	1 x 50	P10536

* Check that the food waste stream goes to an industrial composting process.

CleanWorks® ProEco compostable cloths

COMMON PROBLEMS WITH TRADITIONAL CLEANING CLOTHS

- Disposable cloths are usually made of synthetic fibres, like polyester and polypropylene that can't be recycled, increasing landfill waste
- The disposal of the packaging and polybags of cloths may result in high landfill waste
- Cross-contamination is one of the top causes of food poisoning and is caused when food comes into contact with bacteria; kitchen tools that have not been cleaned thoroughly may transfer bacteria to food if there's direct contact
- Many cloths are hard to rinse and keep clean, wasting time and causing cloths to develop odour quickly
- Inferior disposable food service cloths cause high consumption and increase the time taken to clean

SOLUTIONS PROVIDED BY ProEco COMPOSTABLE CLOTHS

- The ProEco compostable cloth is made from a bio-based raw material which is compostable; helping reduce landfill waste and answering waste management concerns
- Both the polybag and the packaging are made of renewable materials, and the polybag is compostable
- The ProEco compostable cloth is FCC certified (Food Contact Clearance), which makes it safe to use in food service establishments
- The cloth can be used with a variety of chemical solvents, and after rinsing-out can be disposed in the food or 'green' waste bin*
- The unique structure of the ProEco compostable cloth ensures a more hygienic cleaning and easy rinse, for a quick disposal

DIRECTIONS FOR USE:

- Use the cloth
- Thoroughly rinse
- Dispose of in organic waste bin*

* Check that the food waste stream goes to an industrial composting process.
