THE
EARTHSHOT
PRIZE

WINNER 2022

Award-winning Notpla coated kraft food boxes

These FSC certified kraft food boxes are lined with Notpla Coating, a special lining made from seaweed and plants that replaces the usual plastic coating on foodservice products. In 2022, Notpla won the Earthshot Prize in the 'Build a waste-free world' category. Unlike PLA and other bioplastics, Notpla Coating does not require specific recycling pathways or specialised industrial composting equipment to degrade. It takes less than six weeks for it to completely decompose in a home composting environment.

The award-winning Notpla Coating is made from the naturally renewable and abundant source of seaweed.

Notpla Coating:

- A special lining made from seaweed
- Naturally renewable resource
- Grows fast, is globally abundant and readily available
- Does not compete with food crops for land, or require fresh water or fertiliser to grow
- Home compostable in six weeks

Kraft food boxes:

- Boxes manufactured in the UK
- FSC certified board
- Inclusion of grass (up to 30%)
- Saves over 250kg carbon-dioxide and 3000L per tonne of cartonboard when compared to conventional fresh-fibre alternatives
- Recyclable
- Available in 738ml and 1307ml sizes
