Future Smart Fibre lids - the new generation

Innovative moulded fibre lids for hot and cold beverages, which are made from renewable raw materials and manufactured in Germany. The wood fibre material originates from sustainable European forestry. Furthermore, the lids are recyclable and can be processed via paper recycling streams in the UK.

Huhtamaki

Proven to support sustainable sourcing and the principles of the EU Timber Regulation No 995/2010

Fibre lids:

- Manufactured in Germany
- A mono material made from responsibly sourced wood fibres from Europe
- Fully recyclable lids that can be processed via paper recycling streams
- Certified for OK compost HOME and INDUSTRIAL
- Unique Huhtamaki design using the best technical know-how to ensure perfect functionality
- Suitable for enjoying cold and hot beverages
- Round sip hole accommodates a paper straw
