SCJ Professional® Proline WAVE Dispenser

A 1-litre washroom soap dispenser made with 70% recovered coastal plastic, sourced from a global partnership between SC Johnson and conservation organisation Plastic Bank™. Recovered coastal plastic is post-consumer recycled plastic collected on land within 50 km of an ocean so that it does not reach oceans or landfills, in countries with high volumes of uncollected plastic waste.

Proline WAVE Dispenser:

- Each dispenser is the equivalent of 16 x 500ml recovered coastal plastic waste plastic bottles.
- The push buttons on the dispenser are protected by BioCote®, a silver-based antimicrobial agent that inhibits the growth of bacteria and moulds - effective for its lifetime.*

Foam Hand Soap Refills:

- A full range of foam soaps, supplied in ultrasonically sealed airless cartridges which ensure a fresh dose every time.
- Compared to traditional lotion soaps they provide an effective, pleasant hand wash using up to 45% less water and 30% less product when washing and rinsing.**

* BioCote® is a registered trademark of BioCote® Ltd. BioCote® technology effectively reduces bacteria, mould and fungi on the surface of the BioCote® treated SCJ Professional® Proline WAVE dispenser push-button within as little as 2 hours and achieves up to 99.99% reduction over a 24 hour period (efficacy independently validated by ISO methods). BioCote® technology maintains its antimicrobial protection for the lifetime of the dispenser button and will not wear off, wash off or leach out; it is not a substitute for good hand hygiene practices. ** SC Johnson Professional sponsored study: Media4Change Ltd. How a Single Change in a Washroom can significantly reduce water consumption and associated costs, 2011.
