L-Coat cold cups

L-Coat is Huhtamaki's reduced-plastic cold cup construction. It combines a clay-coated, varnished outer surface with a low-PE lining, built for chilled soft drinks, iced coffee, smoothies and milkshakes. Compared with traditional dual-PE cold cups, this construction can reduce PE by up to 59% and enables a minimum of 95% fiber content by product weight, ensuring a paper/card EPR classification.

Huhtamaki

L-Coat cold cups:

- <5% PE lining - full barrier, less plastic
- No quality trade-off, same look, feel and performance
- EPR friendly - qualifies as paper and board under UK rules

"...built for chilled soft drinks, iced coffee, smoothies and milkshakes."

Notpla coated platter boxes and cup carriers

The Notpla range is lined with Notpla Coating, a special lining made from seaweed that replaces the usual plastic coating on foodservice products.

Notpla Coating:

- A special lining made from seaweed
- Naturally renewable resource
- Grows fast, is globally abundant and readily available
- Does not compete with food crops for land, or require fresh water or fertiliser to grow

Notpla Coated Food Packaging:

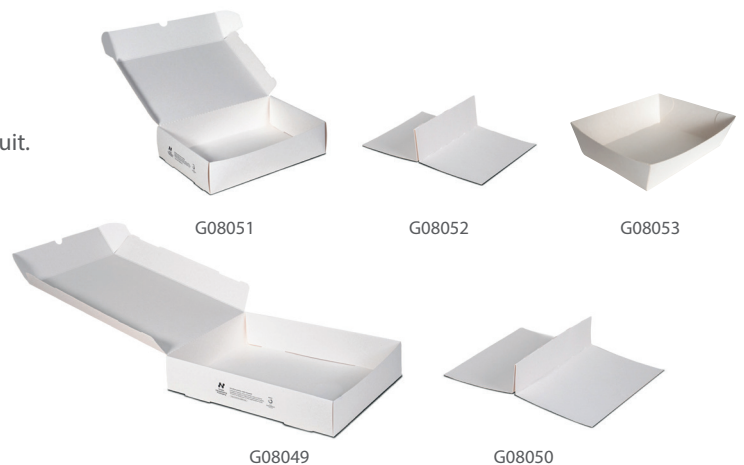

- Boxes manufactured in the UK
- Saves over 250kg carbon-dioxide and 3000L per tonne of cartonboard when compared to conventional fresh-fibre alternatives*
- Fully recyclable (food contamination dependant)

Notpla Platter Boxes and Inserts

Available in two sizes for flexible catering needs, Notpla platter boxes are designed for sandwiches, sushi, tray bakes and fresh fruit.

Size	Description	Colour	Case	Code
10 x 7"	Platter box	White	150	G08051
10 x 7"	Platter insert	White	150	G08052
12 x 9"	Platter box	White	150	G08049
12 x 9"	Platter insert	White	150	G08050
12 x 4"	Platter tray	White	400	G08053

Notpla Cup Carriers

A robust 4-cup drinks carrier designed for fast-paced service, from bars and festivals to stadiums and events - available in two cup sizes.

Size	Case	Code
78mm	240	B06036
82mm	240	B06037

5

A game changing next-generation formulation providing performance and versatility for hot and cold food products.

Excellent Performance

- High moisture (WVTR) and oxygen (OTR) barriers similar to laminated pulp
- High oil and grease resistance (Kit level: >12)

Wide Range of Applications

- Suitable for use in high-speed ovens
- Suitable for Microwave use
- Conventional oven use: 180°C – 30 minutes
- Suitable for freezing
- Suitable for hot-fill applications
- Suitable for denesting

Sustainability

- Without intentionally added PFAS
- > 95% bagasse fibre & < 5% coating
- Compostable: currently certified TUV OK INDUSTRIAL COMPOSTING

Taste Boxes with Morro™ coating - made from plants

Huhtamaki's Taste boxes with Morro™ coating are designed for circularity, and feature a natural plant polymer coating, made without chemical modification, ideal for high-pressure hot food and delivery environments. They meet growing consumer demand for alternative linings that offer excellent grease and leak resistance. These premium boxes are UK manufactured from responsibly-sourced papers and can be custom printed to fully showcase your brand's sustainability values.

Huhtamaki

Taste boxes:

- Keeps food hotter for longer
- Highest quality fluted, corrugated construction provides outstanding insulation
- Versatile range for nearly all food types
- 2-part coating for enhanced performance
- UK-manufactured for reliable supply and lower transport impacts than imported, finished goods
- Three proven sizes (small, medium, large)
- Secure locking lids for safe transport
- Webbed design for leak prevention

USPs:

- Plant based alternative to plastic lining
- Made from plants
- Leak proof
- Perfect presentation
- Heat retaining
- Ideal for delivery and eating in
- Suitable for hot counters
- Great for alfresco dining
- Secure locking lids
- Different sizes available

Taste box	Size	Dimensions	Case
Small Food to Go Box	650ml	80 x 125 x 60mm	360
Medium Food to Go Box	950ml	125 x 125 x 60mm	270
Large Food to Go Box	1400ml	185 x 125 x 60mm	180

Coating made from plants with no chemical modification: Classified as plastic-free and exempt under the Single Use Plastics Directive (SUPD) EU 2019/904. CEPI repulpability report: 99.5% fiber yield for complete packs.

For more information about Taste Boxes with Morro™ coating - **please contact us today.**

TableSMART® 100% recycled* napkins

1 ply folded dispenser napkins

Improving hygiene, reducing waste, and enhancing cost efficiency, unlike traditional napkin stacks, dispenser systems allow guests to take one napkin at a time, which minimizes unnecessary usage, reduces operational costs, and supports sustainability goals by cutting down on material waste.

**100%
RECYCLED**

**EXCLUSIVE
BRAND**

Table SMART

Airlaid dinner napkins

Airlaid napkins are a premium choice in hospitality environments, offering a linen-like feel and superior strength without the need for laundering. Made from airlaid paper, these napkins combine softness with durability, making them ideal for formal dining settings where presentation and guest comfort are paramount. Their high absorbency ensures excellent performance during multi-course meals.

**Airlaid dinner napkin
40 x 40cm (4 fold)**
Case: 500
Code: D10621

* All napkins in the range are 100% recycled with the exception of black and Airlaid napkins.

DrinkSafe anti-spiking drink covers

DrinkSafe anti-spiking covers are single-use foil covers designed to help prevent drink spiking. Made from 100mm sheets of aluminium foil, they fit the vast majority of drinking vessels used across bars and events. The covers are designed so a straw can be easily inserted, while the underside uses a food-safe adhesive intended to hold the cover in place without negatively affecting the beverage.

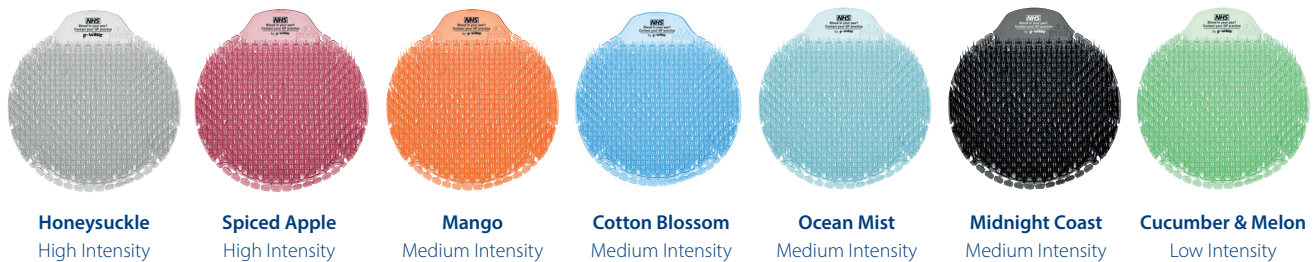

- Foil covers increase customer confidence on nights out
- Adhesive ensures drink cannot be tampered with
- Straw slot for easy drinking
- Designed to cover the majority of drinking vessels

A high-performance urinal screen designed to deliver powerful deodorising and superior splash control.

With up to 5x the fragrance power of many competing products, P-Wave® Slant6 provides a consistently fresh washroom environment for a minimum of 30 days. The innovative angled bristle design delivers virtually zero splash, helping keep floors cleaner and restrooms drier. The double-sided, 'anyway up' construction ensures quick and correct installation every time, making Slant6 a practical, user-friendly solution for busy washrooms.

- Up to 5x the fragrance power of competing urinal screens
- Long-lasting deodorising performance for a minimum of 30 days
- Virtually zero-splash angled bristle design for cleaner floors
- Double-sided 'anyway up' installation eliminates fitting errors
- Contains beneficial bacteria to support deodorising
- Compatible with waterless urinals
- Made with up to 15% recycled material (fragrance dependent)
- Partnering with NHS England for potentially life-saving on-product cancer awareness messaging

**Each screen contains
up to 15% recycled
material (depending
on fragrance)**

Performance without compromise.

PRISTINE ELEMENTUM is a range of paper hygiene products developed to combine high performance with a considered approach to environmental impact. Produced using 100% renewable energy and processes focused on reducing emissions, combined with zero use of plastic film and a supply chain committed to sustainability, PRISTINE ELEMENTUM delivers exceptional hygiene performance with a clear focus on lowering environmental impact.

Pristine Elementum products are crafted using 100% renewable energy, reducing reliance on fossil fuels, which means a more sustainable supply chain. In a market where most tissue manufacturers are still transitioning away from high carbon non-renewable energy sources, Pristine Elementum is setting a new standard.

**MADE WITH 100%
RENEWABLE ENERGY**

Tissue factory is powered
by fossil-free fuel.

**ZERO
PLASTIC FILM**

No plastic film used to
pack these products.

All Pristine Elementum products are packaged without the use of plastic film, helping reduce waste and supporting easier recycling. While some hygiene paper product ranges still use plastic packaging for practical and capability reasons, Pristine Elementum demonstrates what's possible when sustainability comes first.

The PRISTINE ELEMENTUM range combines uncompromising hygiene performance with industry-leading sustainability credentials. Explore the full range and discover how PRISTINE ELEMENTUM can support your organisation's sustainability goals without compromising on quality or performance.

Our **Recycled Unbleached Natural** range is made from 100% certified recycled fibres for a natural finish, ideal for facilities that value visible sustainability and transparency.

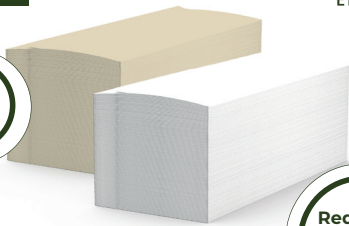

Our **White Pure Pulp** range is made from fully certified responsibly sourced virgin fibres and whitened using an Elemental Chlorine Free (ECF) process, delivering a bright, clean finish for facilities where hygiene and presentation are essential.

Tork SmartOne® Toilet Tissue

The original washroom superhero

Over the last 20 years, European facilities managers have seen countless toilet paper dispensers come and go. But the original Tork SmartOne® toilet paper system has endured, dominating the category as a superhero of maintenance simplicity, cost efficiency and hygienic design.

One-at-a-time dispensing reduces product consumption by **up to 40%¹**

Serves more than **360 guests** between refills¹

Fewer pipe blockages – single-sheet dispensing and rapid disintegration

Innovative design improves hygiene

- The center-pull design of Tork SmartOne® allows people to touch only what they use and reduces the touching of the dispenser (vs traditional jumbo dispensers)

Created with cleaning staff efficiency in mind

- Compatible with Tork Vision Cleaning solution, which helps cleaning teams know exactly when and where refills are needed for all Tork toilet paper, hand towel, soap and sanitiser dispensers
- Tork EasyHandling® packaging for Tork SmartOne® refills, allowing cleaning staff to effortlessly carry products and maintain dispensers

1. Internal research on 7,729 users in Europe. Traditional maxi jumbo dispensers vs Tork SmartOne® Twin Mini dispensers. Reduction accounted for by square metre per visit. Maxi Jumbo 13.2 dm². Tork SmartOne® Twin Mini 8.2 dm². Three months of testing at two locations in Belgium. For the study, there were two locations used: washrooms in the Lunch Garden Restaurant and the Vrije Universiteit Brussel canteen.

Think ahead.

Tork SmartOne® Toilet Tissue

Efficiency – Tork SmartOne®'s high capacity means fewer run outs and less time needed to check and refill dispensers, freeing up time to address pressing hygiene needs

Hygiene – Thanks to the enclosed design, no contamination of the roll inside possible

Sustainability

EU Ecolabel certified refills
– reduced environmental impact
across the product life cycle

Reduce toilet paper consumption
by up to 40% , leads to less
packaging waste (vs jumbo rolls)¹

Dispensers produced with
certified renewable electricity

Making hygiene accessible to all users.
Single sheets delivered at the front of
the dispenser makes it easy to take
paper with one hand.

Control costs, improve hygiene

Tork SmartOne® Mini toilet paper dispensers are perfect for education, healthcare and other high traffic washrooms, where cost control and hygiene needs must be met.

C03091

Also available in black
and stainless steel

Medium Traffic

The Tork SmartOne® Mini Toilet Roll Dispenser in Elevation Design is an efficient and robust dispensing system suitable for demanding washrooms with low to medium traffic.

Tork Elevation dispensers have a functional, modern design that makes a lasting impression on your guests.

C03086

Also available in black

High Traffic

The Tork SmartOne® Twin Mini Toilet Roll Dispenser in Elevation Design is an efficient and robust dispensing system suitable for demanding washrooms with high traffic. By holding two rolls and featuring sheet-by-sheet dispensing, Tork SmartOne® is designed to serve more guests with one high-capacity dispenser.

M03605

Tork SmartOne® Mini Refills

Tork SmartOne® Mini refills provide performance, quality and softness at a balanced cost. This includes soft, high-quality, leaf embossed tissue which leaves a lasting positive impression on washroom visitors.
